FRONT-END DEVELOPER

Enthusiastic Software Engineering student with a strong passion for web development , actively seeking a Job opportunity within a renowned technology company. Possessing a solid background in coding, adept problem-solving abilities, and a keen interest in project management, I am excited to leverage these proficiencies to secure hands-on experience in the realms of web development and software engineering.

WORK EXPERIENCE

Web Developer | Prodigy Infotech Inc

Developed and implemented a diverse portfolio of applications using React:

- Gadget Groove: Created an e-commerce website with React for seamless user experience.
- Weather App: Utilized React for interactive real-time weather updates.
- Portfolio: Designed an interactive portfolio showcasing various projects and skills using React.

Jan 2024 - Feb 2024

Freelancer

As a freelancer, developed and delivered several projects:

- Movie Finder: Leveraged API integration to create a dynamic movie search application.
- Image Searcher: Utilized APIs to build an image search tool with advanced filtering capabilities.
- Blog Page: Designed and implemented a blog page with React for sharing insights and experiences.
